**RE: Epoxy Lining Operations with Warren Environmental S301 Navy Certified QPL Product
Bldg. 739 River Water Pump House Repairs, Naval Support Activity, Indian Head, MD**

Mr. Shapiro and Mr. Sausele,

I wanted to take this opportunity to thank your company for a very impressive epoxy lining operation under very difficult conditions. Performing construction work for NAVFAC (Naval Facilities Engineering Command) is difficult under normal conditions as this client has many layers of engineers, inspectors and managers all of whom interpret their specifications differently, and are difficult to please.

Nevertheless, despite the obstacles of a constantly changing schedule, complications with security and base access, and finally extreme cold, your personnel performed professionally and efficiently under duress. Jeff took the time to patiently explain the coating process & equipment to the NAVFAC Engineers and the feedback I received from the Navy was that all concerned personnel were both satisfied and impressed with the quality of your work.

Thank you again for a high quality job and for achieving a critical milestone on this project under difficult conditions. We will certainly reach out to / and recommend your company for any future projects and we look forward to working with you again.

Sincerely,

THE SEVERN GROUP

Chris Petrakes
Senior Project Manager
